

License and Pricing Options

Eriksson Technologies offers two basic licensing options. Software can either be purchased (prepaid license) or it can be leased on an annual basis. Long-term users tend to favor the purchase option while firms have an occasional need or are reimbursed for direct expenses from their clients tend to favor the lease option. Detailed explanations of each option are given below.

Basic License Options

Option 1: Purchase (Prepaid License): The purchase option includes ninety (90) days of technical support via telephone, fax, and/or e-mail. Optionally, yearly maintenance can be purchased (call for pricing). Maintenance includes unlimited technical support and new versions of the software that are released during the maintenance period.

Option 2: Yearly Lease: The lease option is renewable annually and may be cancelled with thirty (30) days written notice prior to the anniversary date of the lease. Leased software includes full support and all updates to the software during the period of the lease.

Single-User License Fee Schedule

Program	Description	Purchase	Lease
ETCulvert_{tm}	Precast or CIP concrete culvert design in accordance with AASHTO LRFD and Standard Specs. Fully parametric design of 4-sided and 3-sided boxes. Sizes wall thicknesses, develops complete rebar table, and provides detailed calculations, including load rating.	\$995	\$695
PSBeam_{tm}	Precast/prestressed concrete bridge girder design in accordance with AASHTO LRFD and Standard Specs. Simple-span or continuous structures. Supports virtually all girder and framing types.	\$2,995	\$1,295
PSBeam SS	Same as PSBeam, but limited to simple-span bridges only/	\$1,695	\$995
ET Pier_{tm}	Reinforced concrete bridge pier and abutment design in accordance with AASHTO LRFD and Standard Specs. Hammerhead or multi-column piers. Spread, pile, or drilled shaft foundations.	\$3,495	\$1,395

ParaBridge_{tm}	Parametric bridge layout and geometry control. Fast, efficient layout with solution of all bridge geometry. Powerful 3D graphical interface provides true visualization of bridge and superior editing control—the hub of your bridge design process.	TBA	TBA

License Enhancements

Site License: A site license extension is available for either the purchase or lease options. This option permits the licensee to simultaneously use multiple copies of any program. The software can be installed on a local area network or separately on more than one PC, including stand-alone laptop PCs. Generally, a single-user license can be upgraded to a site license for 25% more than the cost of a single-user license.

Multi-Office Discounts: All prices quoted above are for the first office or site of an organization to license the software. Additional offices or sites may be licensed in accordance with the following discount schedule:

Copy of Software	Discount
1 st	0 %
2 nd	25%
3 rd	35%
4 th or greater	50%

For organizations that wish to use the software at more than four separate locations (sites), an enterprise license is available. This permits the software to be used freely by all employees at all offices within the organization without regard to the number of simultaneous users. Please call for pricing.

Educational Licenses

Accredited universities and colleges are eligible for special restricted use educational and research licenses. Please contact our office for further details.

For questions and additional information, please visit www.LRFD.com or call us toll-free at 1-866-374-5776 (866-ERIKSSON).
